

Wisconsin Internet is Racine's only locally owned and operated full-service Internet Service Provider and has been a RAMAC member company since its founding in 1995. We are also a founding member of RTO and a proud member of the Wisconsin State Telecommunications Association. We offer several Internet-related services, including dial-up and T1 connectivity. In addition we offer server co-location, e-commerce solutions, web page hosting, design and consulting. When combined with our local technical support team we deliver friendly, cost-effective, reliable Internet solutions that will help power the future growth of Southeastern Wisconsin.

e-Vergent High Speed Wireless broadband is powered by Wisconsin Internet's reliable - redundant network backbone and facilities. Our wireless network currently has access points on towers in Racine and Kenosha Counties.

* e-Vergent has committed to providing reliable high speed Internet service in Southeastern Wisconsin.

* As a wireless service, e-Vergent is available in areas where other types of service can't reach. e-Vergent can provide business or residential customers with reliable connectivity where others can't.

* Using towers right here in Racine, e-Vergent is consistently outperforming satellite connections in performance and reliability.

* A point-to-point wireless connection can avoid the nightmare of dealing with multiple carriers to maintain service. e-Vergent does not rely on third party infrastructure for the "last mile" connectivity.

Visit our website and give us a call or send us an email with your questions or to signup for service.
